

Dedicated to Professor Max Gunzburger on the occasion of his 75th birthday Preface

Int. J. Numer. Anal. Mod., 19 (2022), pp. i-ii.

[Preview](#) [Full PDF](#) 194 8486 [Abstract](#)

The Scott-Vogelius Method for the Stokes Problem on Anisotropic Meshes

Kiera Kean, Michael Neilan & Michael Schneier

Int. J. Numer. Anal. Mod., 19 (2022), pp. 157-174.

[Preview](#) [Full PDF](#) 170 8042 [Abstract](#)

An Exponential Time Differencing Time-Stepping Scheme for the Tracer Equations in MPAS-Ocean

Sara Calandrini, Philip W. Jones & Mark R. Petersen

Int. J. Numer. Anal. Mod., 19 (2022), pp. 175-193.

[Preview](#) [Full PDF](#) 198 8341 [Abstract](#)

Structure-Preserving Numerical Methods for a Class of Stochastic Poisson Systems

Yuchao Wang, Lijin Wang & Yanzhao Cao

Int. J. Numer. Anal. Mod., 19 (2022), pp. 194-219.

[Preview](#) [Full PDF](#) 212 8140 [Abstract](#)

A Computational Study of Preconditioning Techniques for the Stochastic Diffusion Equation with Lognormal Coefficient

Eugenio Aulisa, Giacomo Capodaglio & Guoyi Ke

Int. J. Numer. Anal. Mod., 19 (2022), pp. 220-236.

[Preview](#) [Full PDF](#) 178 7840 [Abstract](#)

Reduced Approach for Stochastic Optimal Control Problems

Lihong Chen, Meixin Xiong & Ju Ming

Int. J. Numer. Anal. Mod., 19 (2022), pp. 237-254.

Optimal Control Problem of an SIR Model with Random Inputs Based on a Generalized Polynomial Chaos Approach

Yoon-Gu Hwang, Hee-Dae Kwon & Jeehyun Lee

Int. J. Numer. Anal. Mod., 19 (2022), pp. 255-274.

Error Estimates and Blow-Up Analysis of a Finite-Element Approximation for the Parabolic-Elliptic Keller-Segel System

Wenbin Chen, Qianqian Liu & Jie Shen

Int. J. Numer. Anal. Mod., 19 (2022), pp. 275-298.

A Stress Test for the Midpoint Time-Stepping Method

John Burkardt, Wenlong Pei & Catalin Trenchea

Int. J. Numer. Anal. Mod., 19 (2022), pp. 299-314.

On an Adaptive LDG for the P-Laplace Problem

Dongjie Liu, Le Zhou & Xiaoping Zhang

Int. J. Numer. Anal. Mod., 19 (2022), pp. 315-328.

A Comparison of Regularization Methods for Boundary Optimal Control Problems

Giorgio Bornia, Andrea Chierici & Saikanth Ratnavale

Int. J. Numer. Anal. Mod., 19 (2022), pp. 329-346.

Analysis and Numerical Results for Boundary Optimal Control Problems Applied to Turbulent Buoyant Flows

Andrea Chierici, Valentina Giovacchini & Sandro Manservigi

Int. J. Numer. Anal. Mod., 19 (2022), pp. 347-368.

Reduced Basis Finite Element Methods for the Korteweg-de Vries-Burgers Equation

Guang-Ri Piao, Fuxia Yao & Wenju Zhao

Int. J. Numer. Anal. Mod., 19 (2022), pp. 369-385.

[Preview](#) [Full PDF](#) 184 7353 [Abstract](#)

A Weighted Least-Squares Finite Element Method for Biot's Consolidation Problem

Hsueh-Chen Lee & Hyesuk Lee

Int. J. Numer. Anal. Mod., 19 (2022), pp. 386-403.

[Preview](#) [Full PDF](#) 155 7543 [Abstract](#)

Numerical Analysis of High Order Time Stepping Schemes for a Predator-Prey System

Konstantinos Chrysafinos & Dimitrios Kostas

Int. J. Numer. Anal. Mod., 19 (2022), pp. 404-423.

[Preview](#) [Full PDF](#) 169 7445 [Abstract](#)

Clipping over Dissipation in Turbulence Models

Kiera Kean, William Layton & Michael Schneier

Int. J. Numer. Anal. Mod., 19 (2022), pp. 424-438.

[Preview](#) [Full PDF](#) 163 7007 [Abstract](#)
