Scope

The *Taiwanese Journal of Mathematics*, published by the Mathematical Society of the Republic of China (Taiwan), is a continuation of the former *Chinese Journal of Mathematics* (1973-1996). It aims to publish original research papers and survey articles in all areas of mathematics. It will also occasionally publish proceedings of conferences co-organized by the society. The purpose is to reflect the progress of mathematical research in Taiwan and, by providing an international forum, to stimulate its further developments. The journal has appeared bimonthly each year since 2008.
